

PRESS RELEASE - NEW ALBUM.
JAMHUNTERS: 'CLIMATE'.

The Danish smooth jazz duo *Jamhunters* release their 6th album – *Climate* – on 1 February 2023. The duo consist of guitarist Lars Fabiansen and keyboard player Peter Michael who, ever since the beginning in 2005, have written and produced all the music on this their sixth album.

The eight tracks on this album, including preludes, take inspiration from the climate crisis. The idea for the album came about during the COVID-19 pandemic when we - and most other musicians - due to the restrictions on gatherings suddenly had a lot of time on our hands. The pandemic is also the reason why the album has been recorded in six different home studios.

Climate is an instrumental album for people who need to chill and forget about their busy lives for a while, but it's also an album for people who appreciate music "played by hand". To quote from Jamhunters' first album: "Close your eyes and imagine".

Initially, the album will be available digitally on all music platforms.
